

## 3-IN-1 TRAVEL BAG

TRUCO (Travel Utility Carry On)

Multi-function convertible luggage is a new trend that is very smart—and very good for us travelers. Common sense and actual road experience informs the design of the new **TRUCO** (Travel Utility Carry On) modular luggage from **Balanzza**. This is three pieces of luggage that bind into one rolling bag for easy transport, but give you a diverse range of uses when you separate the components. Luggage fees for the airline industry rose to just shy of a whopping \$3 billion in 2010, despite fewer people flying, so everyone is looking for ways to avoid checking big suitcases. Here you have a carry-on roller bag as the base module, a laptop bag that snaps securely on to double your use, and a personal valuables bag (in case they gate-check hand luggage so you can keep the most important items with you). Use only what you need for shorter trips, or pack it up for a luxurious vacation. \$199. [www.balanzza.com](http://www.balanzza.com)
